Professional Jet Solutions FZCO, 'ProJet', has been providing a wide-scope of aviation consulting services since September 2005.

Our value-proposition is to apply an extensive aviation knowledge, experience and contacts database in addressing a Client's requirements in the most efficient manner.

Our customized solutions build long-term Client relationships, throughout an asset's life-cycle. We aim to exceed expectations in every case, and simplify our Client's aviation decisions based on facts coupled with independent judgment and advice.

Our Clients range from Private individuals, Corporations, Financial institutions, Governments, Equipment Manufacturers, Investors, Operators to Mainline and Regional Passenger Airlines.

The ProJet Head Office is based in Dubai, UAE, and extends itself globally through trusted Industry Partners.

Our Consultants have gained extensive experience in the aviation industry across the Airline, Private/Corporate and Military segments.

They are equipped with a broad set of skills and knowledge across areas such as Business Development, Programme Management, Sales, Marketing, Customer Support, Operations, Engineering, Financial and Management Accounting.

With many successful projects throughout the world, they have been exposed to many International environments and cultures.

Aircraft Sales and Acquisitions totalled 15 aircraft in 2006 to 2007. Alongside the sales/purchases, we provided production and completion oversight, interim and delivery inspections/acceptances and placed into service.

Aircraft sales and acquisitions are very complicated transactions, through which we guide our Clients along the following stages:

- Analysis
- Negotiation & Acquisition
- Production/Customization/Completion
- Pre & Post Acquisition Support

ProJet reinforces the integrity of a Client's operations through maintenance, safety, security and operational assessments, and development of technical or other manuals and programmes.

Specific capabilities, and past accomplishments, include:

Independent Auditing and Technical Analysis

Development and Implementation of:

- Comprehensive Action Plans to mitigate safety hazards
- Integrated Quality Management System (QMS)
- Integrated Safety Management System (SMS)
- Proactive Flight Ops QA (FOQA) / Flight Data Analysis programmes
- All-encompassing Emergency Response Plan (ERP)
- Security Programs

Preparation of Technical and Operational Manuals such as:

- Flight Operations Manuals (OM-A, OM-B, OM-C and OM-D)
- Cabin Crew Operations Manuals
- Minimum Equipment Lists
- Maintenance Management Expositions
- Aircraft Maintenance Schedules

Establishing and amending Air Operator's Certificates (Private and Commercial)

Facilitating entry-into-service of aircraft with suitable Operators
Civil Aviation Authority Representation and Regulatory Guidance

Governance Assessments

Expert witness testimony
